FASB 133
\$650.00
Accounting for Derivative Instruments & Hedging Activities

These New Rules

1. apply to all entities
2. are effective as of January 1, 2001 (or before)
3. require mark-to-market valuation of derivatives and related physicals
4. require on-going evaluation of hedge effectiveness

At This One-Day Seminar, You will learn:

1. how to designate hedges
2. how to handle transition adjustments
3. how to access hedge effectiveness
4. how to treat embedded derivatives
5. how to handle options time decay
6. how to develop and maintain compliant documentation
7. when you can treat derivatives on a portfolio basis
8. how to find fair market valuations for NG swaps, swaptions, basis swaps, and forward physical deals
9. how to make your shop fully FASB 133 compliant

Attendees will receive and work with a 535 page guide to FASB Statement 133 and 7.0 hours of CPE credit.

About Your Instructor: Ashmead Pringle

Ashmead Pringle is president of Grain Service Corporation and GSC Energy, its energy hedging division. GSC specializes in providing training, consulting, and brokerage services to commercial energy hedgers. Ash has a BS in mechanical engineering from Duke University and an MBA from Harvard Business School. He's conducted hundreds of seminars on risk management, and attendees consistently give him high marks for his effective presentation, knowledge of the subject, and ability to simplify complex concepts. In bringing energy managers this practical hands-on workshop, GSC draws on many years of experience in teaching and in working every day with energy hedgers.
